MILWAUKEE PACKOUT MOUNTING PLATE

Thank you for purchasing your Milwaukee Packout Plate from AAL! We greatly appreciate your trust in our company. We take that purchase and your commitment to us very seriously. If you have any questions along the way, please don't hesitate to give us a call at 385.202.4188.

****Please read all instructions carefully****

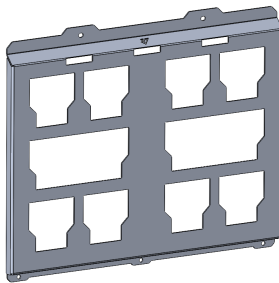

Tools Required:

- 4mm Allen Key

What's included:

Parts

- Packout Mounting Plate (1):

Hardware

- M6x20mm Button head Bolts 2

- M6 Nylon Locknuts 4

- M6x35mm Button head Bolts 2

- 18.94mm OD Aluminum Spacer 2

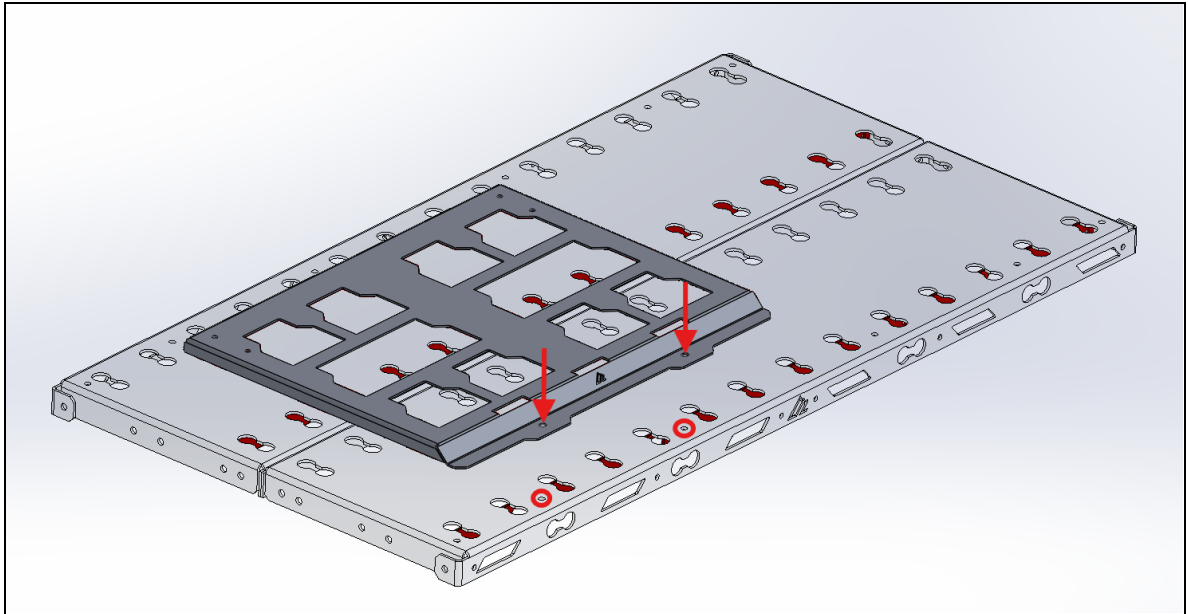

- 25mm OD Aluminum Spacer 2

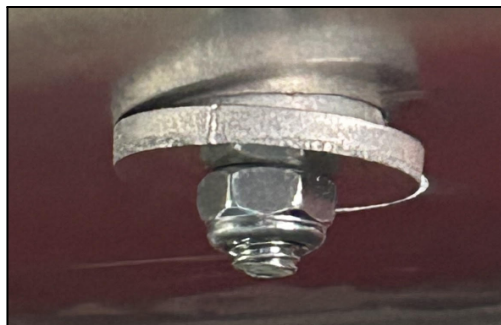

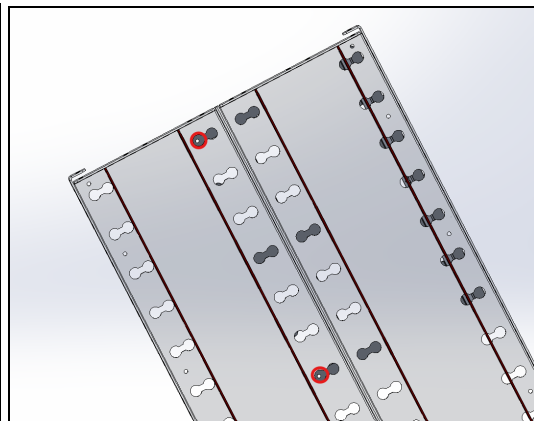

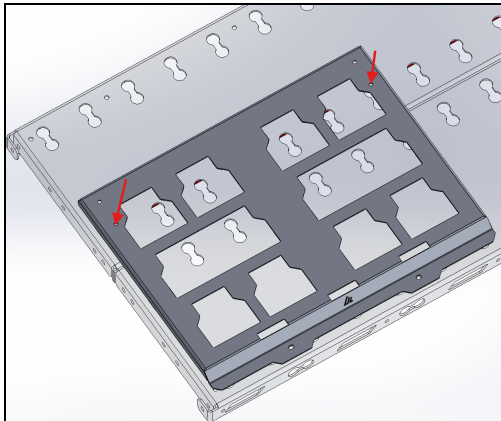

Install

To install, simply align the flange holes in the packout panel with any of the inner pairs of holes in the top of the platform (in the example shown below the left side pair is used). Do so using **(2) M6x20mm Button Head Bolts** and **(2) M6 Locknuts**.

For the back set of holes, install through the front set of holes using **(2) M6x35mm Flat Head Bolts** such that the bolt falls through the dogbone. We provide two different sets of spacers, find the smaller spacer and place it on top of the larger one and fasten the bolt to the platform with this spacer stack placed flush with the dogbones and use the **(2) remaining M6 locknuts** to fasten each one. The example image is tilted to better depict the insertion.

Share Your Photos!

We take great pride in building our products and we hope that pride extends to you after installing your Jeep JL/JT Rear MOLLE Door Panels . If you are able to share your photos online (Facebook and Instagram), please tag **@AmericanAdventureLab**. We would love to see how it turned out and give you some reciprocal attention in return!

Congrats! You're all done!

Thank you!

At American Adventure Lab, we strive to improve anywhere we can. If you experience any issues with this product or have any suggestions, please let us know.

If you have any questions or concerns, please don't hesitate to reach out to us at 385.202.4188 or via email at Support@erp.adventurelab.com.
