BRONCO BATTERY CUTOFF AND MAXI FUSE BRACKET

Thank you for purchasing your Bronco Battery Cutoff and MAXI Fuse Bracket from AAL! We greatly appreciate your trust in our company. We take that purchase and your commitment to us very seriously. If you have any questions along the way, please don't hesitate to give us a call at 385.202.4188.

****Please read these instructions thoroughly before starting this project.****

****The wiring of the battery and fuse are NOT Included in this document****

Tools Required:

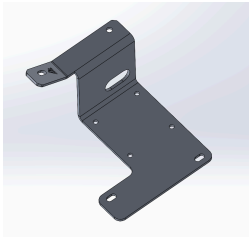

There is more than one tool for every job, but below is the list of tools we use for this installation.

- M4 Allen Socket/Wrench
- M3 Allen Wrench/Socket
- Ratchet

What's included:

Parts:

Main Bracket (1):

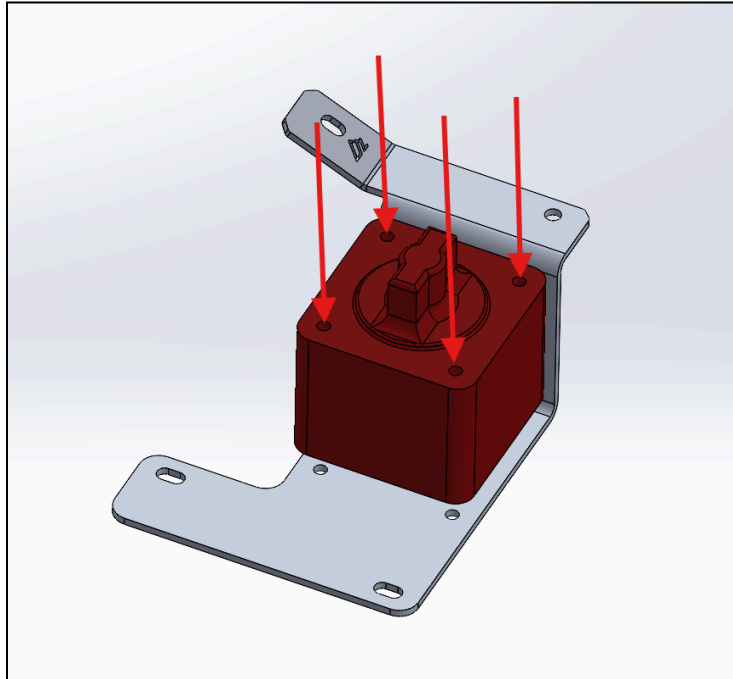

Hardware:

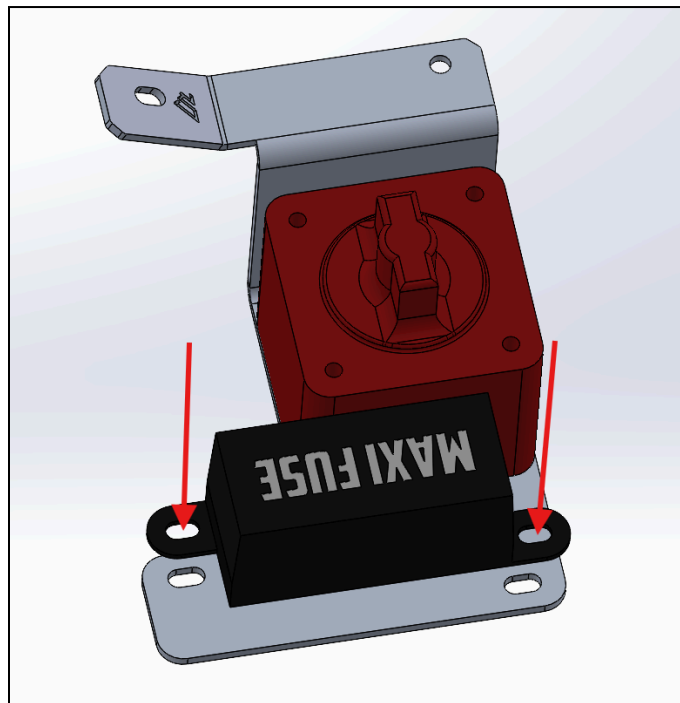

M5x65mm Button Head Bolts	4	M5 Nylon Lock Nuts	4
M6x14mm Button Head Bolts	2	M6 Nylon Lock Nuts	2

Step 1: Install the Battery and Fuse into the Bracket

There isn't much to this install, to begin with, simply fasten the battery to the bracket through the top face using (4) M5x65mm Button Head Bolts and (4) M5 Lock Nuts.

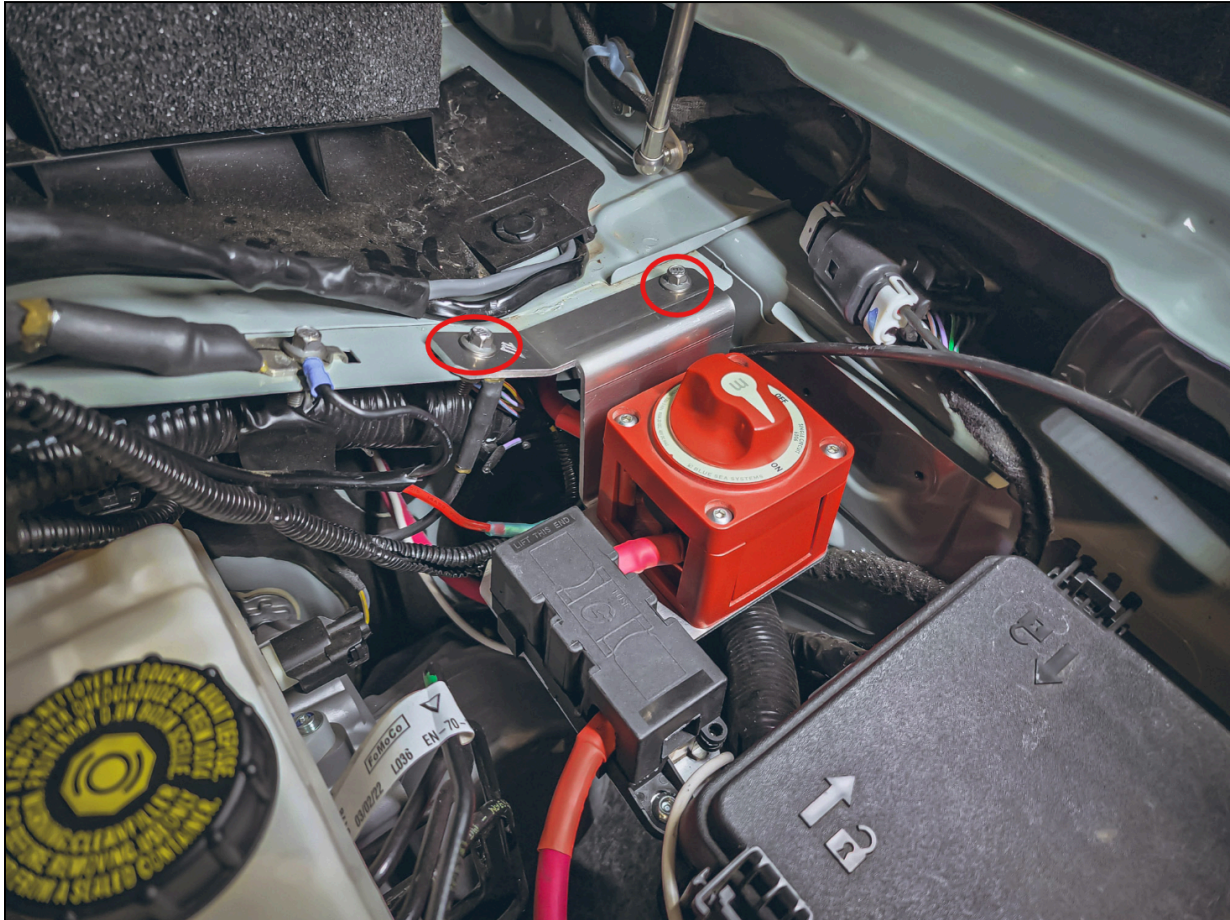

Similarly with the fuse bracket, attach through the top face of the bracket using (2) M6x14mm Button Head Bolts and (2) M6 Lock Nuts

Step 2: Install the Bracket to the Vehicle

To install the fixture to the vehicle, locate the member under the hood which runs from the driver side to the passenger side. Go to the driver side of the member and locate the two holes that match with the edge flange of the bracket, one inclined, and one flat. Once located, install using the factory cross member hex head bolts. The finished attachment should appear as follows:
